## REACH Compliance Declaration (A19-191)

We hereby also certify that all parts manufactured by Thin Film Technology are fully compliant with the related requirements of European Union Regulation (EC) 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH) :

1. Under the structure of the REACH regulation, Thin Film Technology is a manufacturer of "ARTICLES" to our EU customers (according to ECHA's guidance for articles, the electronic components shall be considered as articles). We do not manufacture "substances" or "preparations" and our articles do not involve the "intentional release of substances". Accordingly, we foresee no registration or pre-registration or Authorization requirement for the products we supplied.
2. With regard to the requirements of Article 33 of REACH : Duty to communicate information on substances in articles. We declare that except for Note 1 below, none of the SVHCs (The candidate list of Substances of Very High Concern for authorization currently released by ECHA till the date of June 27, 2018 please refer to Annex 2) is present in TFT's products and or packaging in quantities totaling in concentration equal or above 0.1%
3. With regard to the requirement of Article 67 of REACH: A substance on its own, in a preparation or in an article, for which Annex XVII, contains a restriction shall not be manufactured, place on the market or used unless it complies with the conditions of that restriction. We declare that none of the substances in the conditions of restriction is present In Thin Film Technology's products or packaging.

As REACH regulation is updated frequently, for the major changes afterwards, such as the addition of SVHC substances into Annex XIV, the addition of restricted substances in Annex XVII, TFT will evaluate the further revisions in time and update this declaration to reflect these changes.

Note 1: The contents of PbO (CAS No. 1317-36-8) in some materials of ceramic electronic component will transfer to glass which is out of SVHC scope. This is related to TFT's thick film resistors with the exception of our TFG\* Series which is totally lead free. Please refer to the JEITA's explanation below (Annex 4).

Note 2: Some of our Chip-R product test reports contain lead (CAS No. 7439-92-1) >1000 ppm, but lead is not added to all of raw materials and manufacturing process, only Lead Oxide (CAS No. 1317-36-8) is contained in some raw materials, and lead oxide is in the final product, but will be transferred to glass which is out of SVHC scope.

Please see Annex4: PbO (Cas No. 1317-36-8) JEITA's explanation pages 2A and 2B
